# A Canvas for Teachers

canvas k-12

Canvas, is a simple, easy-to-use learning management system from Instructure. Canvas allows teachers to do everything they need to do in a single system giving them more time to do what they do best—teach.

Attendance

Gradebook

Papers & Notes

State Standards

Quizzes & Tests

Everything You Need in a Single System

Canvas is a single, **integrated system** that includes attendance, assessments, grading, state standards tracking, messaging, learning analytics, and a lot more.

No more messing arround with multiple systems, so you can get in, get out and move on.

Help Students Succeed with Learning Analytics

Know how the class is doing with specific concepts, which students need extra help, and which assignments are most effective. **Learning Analytics** provide **comprehensive feedback** enabling early intervention for improved success.

"I've been extremely pleased with its performance and the reaction of our teachers. Our implementation process has been a huge success; we're looking forward to a long future with Canvas."

—Dennis Frye
Rockingham County School District

Easy to Use

Canvas has a clean interface with an **intuitive workflow**. Both students and teachers find Canvas easy and fun. Very little training is required to begin using the system, making it immediately useful in your classroom.

Grade Faster with SpeedGrader™

SpeedGrader simplifies grading by displaying everything needed to grade an assignment in a single view. Quickly preview files, grade assignments and leave feedback. **SpeedGrader** is also available on the iPad.

Help Courses Come Alive

Teachers and students can **easily add video, audio and other media** to courses. Dynamic courses foster meaningful discussions both inside and outside of the classroom.

Better Communication

Canvas creates an open dialog between teachers, students and parents. Teachers can send individual, group, and course-wide messages viewable by students and parents alike. Since **parents are co-enrolled**, they can receive notifications about their student's progress.

Achieve Better Results with Rubrics

Rubrics let students know exactly how an assignment will be graded, helping them **focus on the areas that matter**. Adding rubrics to an assignment is quick and simple. Rubrics allow you to easily tie state standards to activities in your classroom.

Teachers can use Canvas for free!
